

STAKE FUNDEX

Ultimate Future of Decentralized Staking

A next-generation decentralized staking ecosystem built for sustainable rewards, controlled token flow, and long-term growth.

 BUILT BY INTELLIGENCE

www.stakefindex.com

What is StakeFundex?

StakeFundex is a decentralized staking ecosystem designed for sustainable rewards, controlled token flow, and long-term growth.

Multi-Layer Staking

Stake in both SDX & USDT for maximum flexibility

Auto Compounding (Every 12 Hrs)

Reward engine that grows your stake automatically

Smart Release

Controlled and transparent reward release system

Turbine Liquidity

Turbine-based mechanism for stable liquidity

Fully On-Chain

Fully transparent smart contract operations

Vision & Mission

Vision:

To build a sustainable and transparent staking ecosystem on Polygon.

Mission:

Empower users through auto-compounding rewards, long-term growth, and community-driven profits.

Token Overview

PARAMETER	DETAILS
Token Name	Stakefundex Token
Token Symbol	SDX, gSDX
Network	Polygon (MATIC)
TYPE	ERC-20 Mintable
Decimal	18
Utility	Staking & Rewards Distribution

Staking Overview

StakeFundex offers three distinct staking types, each designed to serve different investor goals — from flexible daily compounding to long-term locked positions with enhanced returns.

Regular Staking

Flexible staking with daily ROI and auto-compounding every 12 hours. Ideal for participants who want consistent, accessible growth.

Future Staking

Lock your tokens for 45 to 360 days and earn higher daily ROI. The longer the lock, the greater the reward multiplier.

LP Bond (USD Stake)

Stake in USDT with dual earning benefits — stable ROI plus market price drop protection. Best suited for volatile market conditions.

Regular Staking (SDX Stake)

Key Metrics

0.6%

Daily ROI

Earned on your
staked principal

0.3%
Every 12 Hours

Rewards distributed
twice daily

How It Works

Regular Staking is the most accessible entry point into the StakeFundex ecosystem. Your principal earns 0.3% every 12 hours, compounding automatically to maximize your returns over time.

01

Stake SDX

Deposit your tokens into the regular staking pool

02

Earn Every 12 Hours

0.3% ROI is added to your balance automatically

03

Auto-Compound

Earnings are reinvested to grow your principal continuously

Future Staking (SDX Stake)

Lock your tokens for a defined period and earn progressively higher daily returns. Higher lock duration = Higher rewards.

Lock Duration

45 Days
90 Days
180 Days
360 Days

Daily ROI

0.7%
0.8%
0.9%
1.0%

1

Choose Lock Period

Select 45, 90, 180, or 360 days

2

Lock Tokens

Tokens are secured in smart contract

3

Earn Higher ROI

Daily returns compound every 12 hours

4

Claim Rewards

Withdraw at end of lock period

LP Bond (USD Stake)

LP Bond is designed for stable ROI + market protection benefits — a dual earning model that works best in volatile markets. Compounding occurs every 12 hours.

Lock Duration	Daily ROI	Price Drop Benefit
45 Days	0.7%	95% – 100%
90 Days	0.8%	90% – 100%
180 Days	0.9%	85% – 100%
360 Days	1.0%	80% – 100%

Dual Earning Model

Earn both ROI and price drop protection simultaneously

Volatile Market Ready

Designed to perform best when markets fluctuate

Higher Lock = Better Stability

Longer commitments unlock greater protection ranges

Boosting Reward

Note: APPLICABLE ONLY FOR LP BOND STAKING

Earn **3%** boosting reward on your direct referral's stake.

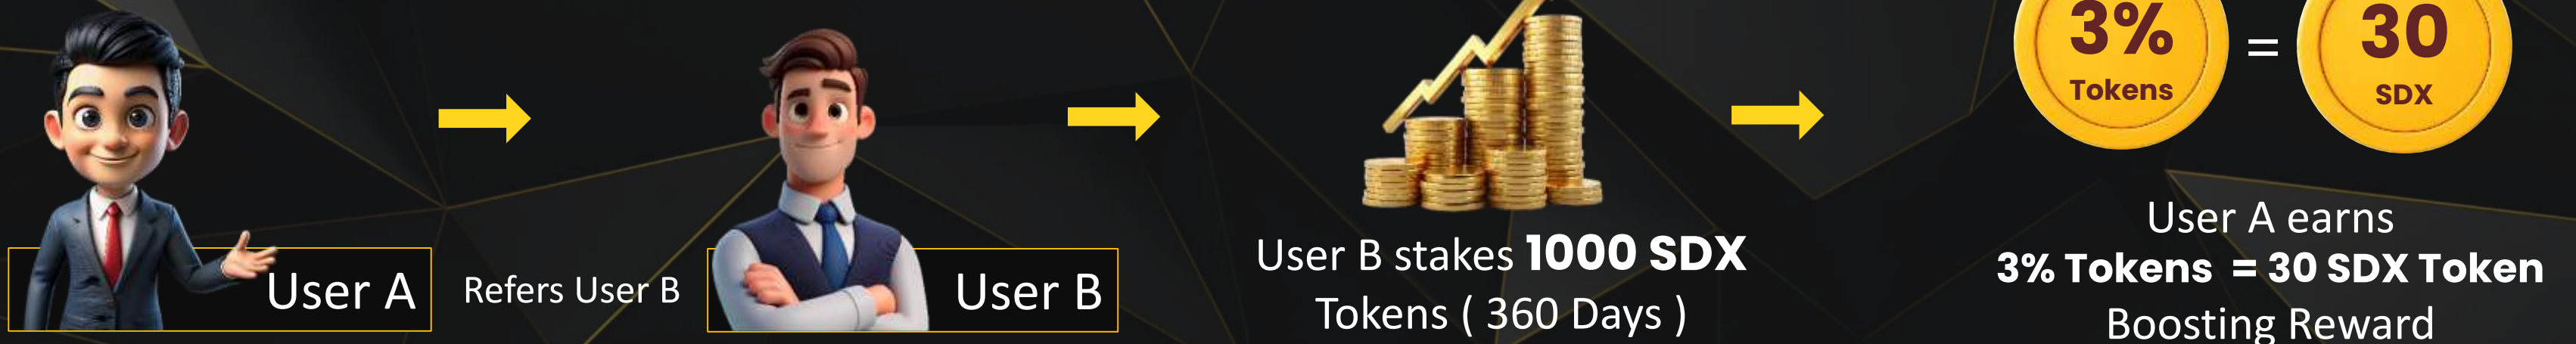

To qualify for boosting rewards, the referring user must :

- Maintain an active 360-day LP Bond stake.
- Hold a minimum stake of \$100.
- Eligibility is verified at the time of referral staking.

Reward Distribution System :

- Boosting rewards are not distributed instantly.
- Rewards are credited during the next reward cycle.

Real Example :

Core System Rules

How ROI Works

12-Hour ROI Cycle

ROI is generated and applied to your balance every 12 hours without manual intervention.

Auto-Compounding Applied

Each cycle's earnings automatically added to your principal, increasing the base for the next cycle.

Continuous Growth

Rewards grow continuously as long as your stake remains active in the ecosystem.

The Formula

Every new ROI cycle builds on the full accumulated value of your position:

New ROI = Principal + Earnings

Your compounding base grows with every single cycle, accelerating returns over time.

StakeFundex
ULTIMATE FUTURE

Reward Distribution

StakeFundex offers a multi-layered reward system that goes beyond simple staking ROI — empowering participants to earn through referrals, team building, and creator milestones.

10%

Referral Bonus (Every 12 Hrs)

Earn 10% on every direct referral's staking activity

75%

Team Bonus

Up to 75% ROI on ROI through differential team bonuses across 15 levels

\$18K

Creator Bonus

Up to \$18,000 in creator bonuses for top-tier ecosystem builders

3%

Boosting Reward

To qualify Have active 360 day stake , Self Min Stake \$100

Team Bonus Structure

Level	Personal Stake (\$)	Total Team Business (\$)	Valid Referrals	Differential Bonus
S1	100	5,000	2	5%
S2	500	20,000	3	10%
S3	1,000	50,000	4	15%
S4	2,000	150,000	5	20%
S5	3,000	400,000	7	25%
S6	5,000	1,000,000	7	30%
S7	10,000	2,500,000	8	35%
S8	12,000	6,000,000	9	40%

S14	15,000,000	15,000	1,296
S15	18,000,000	18,000	1,440

gSDX Reward Layer

gSDX represents the reward layer within the StakeFundex ecosystem. Instead of instant distribution, rewards are issued as gSDX and processed through a structured release system.

- **Controlled reward realization**
- **Improved liquidity stability**
- **Reduced sudden supply pressure**
- **Transparent reward tracking**

*Designed to maintain long-term ecosystem balance

Reward Claim & Release

StakeFundex uses a structured, transparent reward release process to ensure controlled distribution and ecosystem sustainability.

Rewards as gSDX

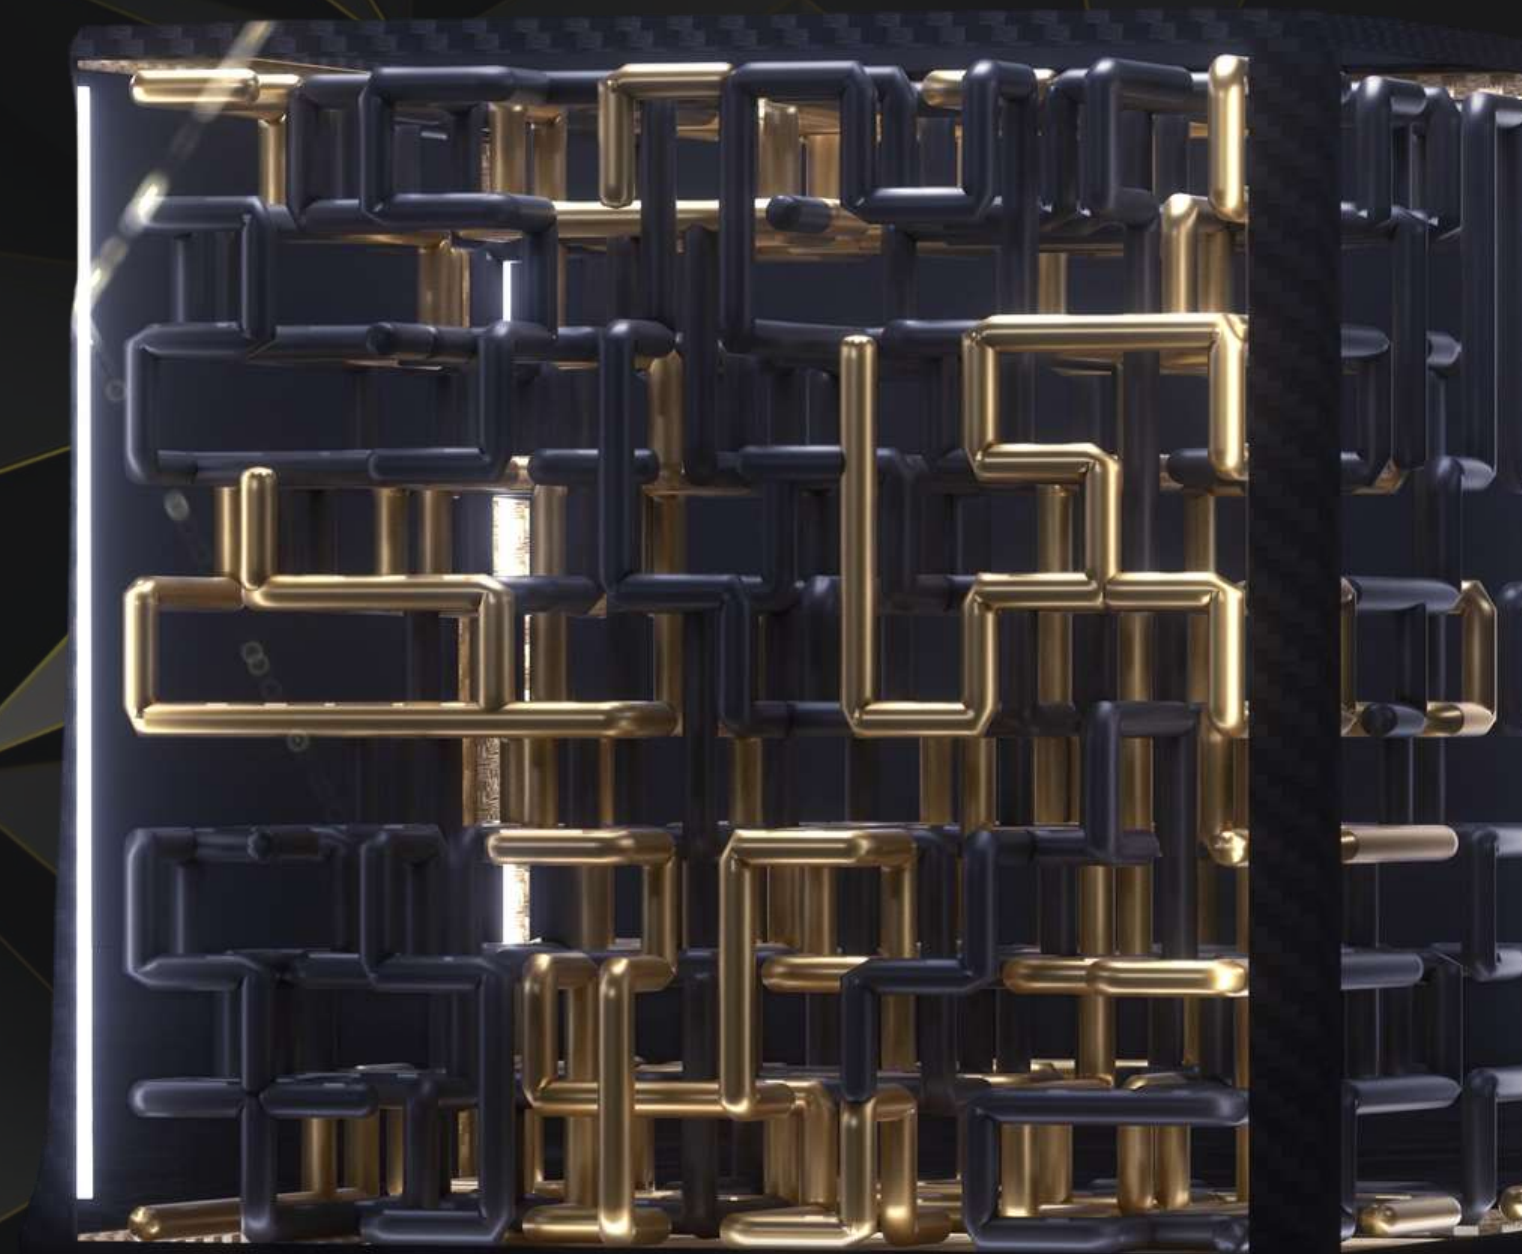

All earned rewards are initially received in gSDX — the governance-linked reward token of the ecosystem.

Release Wallet

gSDX is moved to a dedicated release wallet where it undergoes the conversion process before becoming withdrawable.

Controlled & Transparent

Every step of the claim and release process is recorded on-chain, ensuring full visibility and accountability.

Vesting Framework

The vesting system balances participant flexibility with ecosystem sustainability. Faster withdrawals incur higher fees, while longer vesting periods reward patience with reduced or zero fees. All fees are used to buy SDX and send tokens to the treasury.

Vesting Duration	Fee
0 Days	20%
10 Days	15%
20 Days	10%
30 Days	5%
60 Days	0%

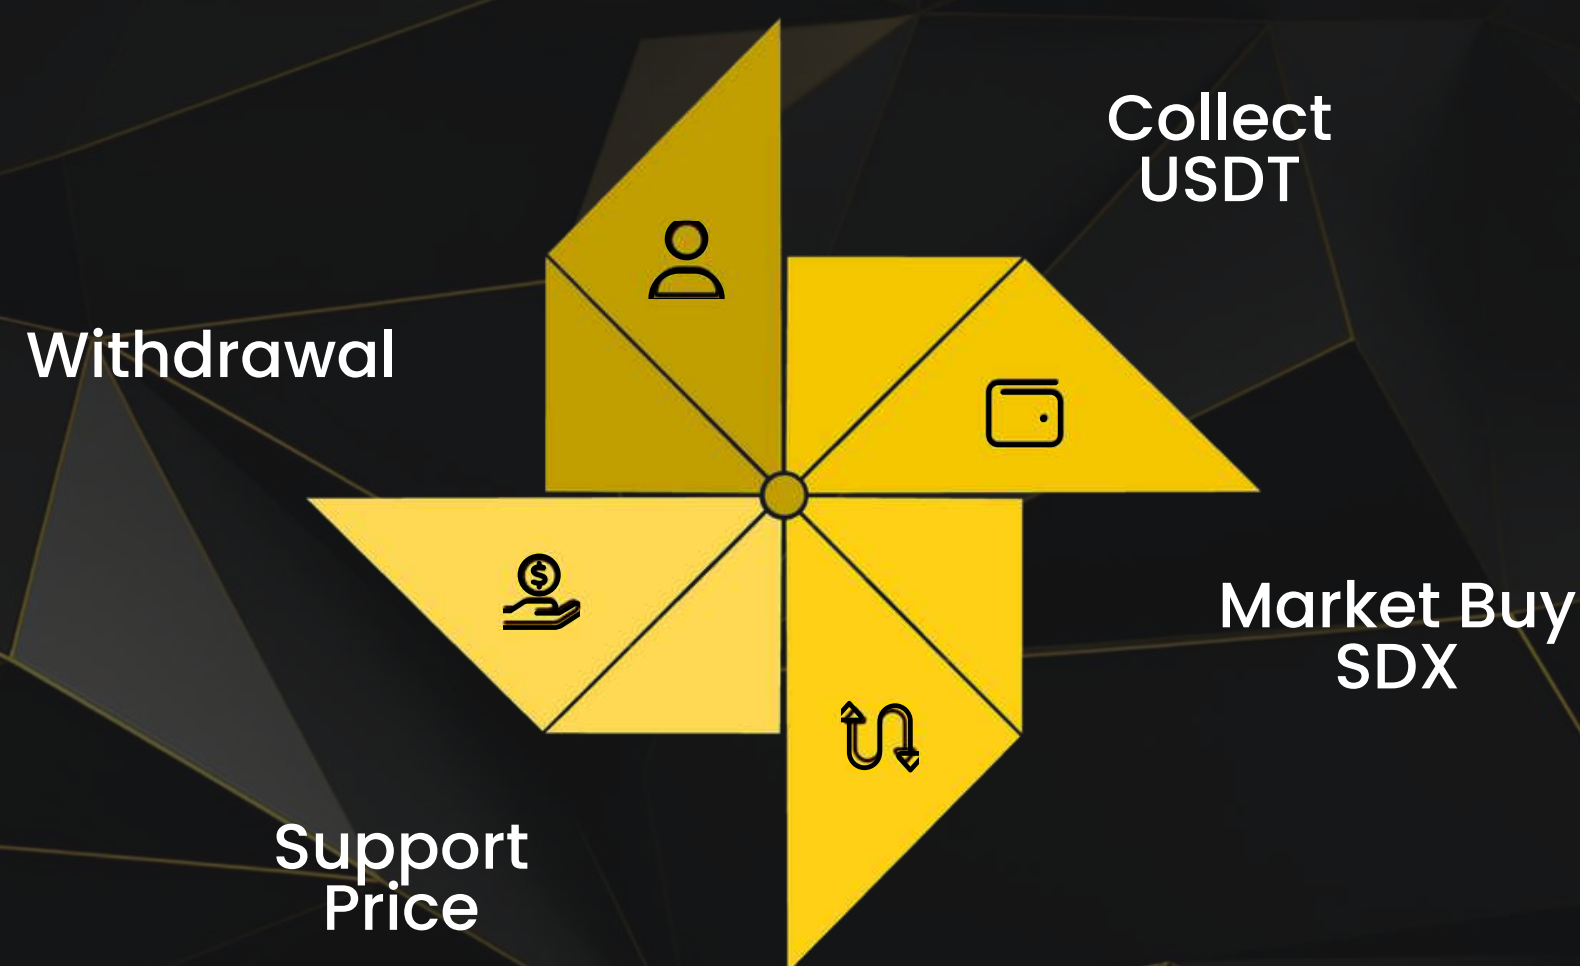

Why Vesting Matters

- **Faster Withdrawal = Higher Fee**
Immediate withdrawals carry a 20% fee to protect ecosystem liquidity
- **Longer Vesting = Lower Fee**
Wait 60 days and withdraw with zero fees
- **USDT Buys SDX**
Fees are used to purchase SDX, creating buy pressure
- **Treasury Strengthened**
Purchased tokens are sent to treasury, ensuring sustainability

Turbine Mechanism

The Turbine is one of StakeFundex's most innovative features — a liquidity stabilization engine that converts withdrawal activity into positive market pressure.

Converts Withdrawals

Every withdrawal feeds the turbine, transforming outflows into market buy orders

Creates Buy Pressure

Systematic market buys support and elevate the SDX token price over time

Stabilizes Liquidity

Prevents sudden liquidity drains by recycling value back into the ecosystem

Prevents Price Drops

Continuous buy pressure acts as a natural floor against sudden price collapses

StakeFundex
ULTIMATE FUTURE

StakeFundex DAO

StakeFundex is governed by its community through a structured, proposal-based DAO (Decentralized Autonomous Organization) system. Participation is intentional — not passive.

Proposal-Based Governance

Changes to the ecosystem are initiated through formal proposals submitted by qualified stakeholders.

No Continuous Voting

Voting only occurs when an active proposal exists. There is no passive or automatic participation.

Community-Driven Decisions

All major ecosystem decisions are made collectively by token holders with governance weight.

Key Principle: No Proposal = No Participation. Governance is active and intentional by design.

Governance Weight (pSDX)

Governance power in StakeFundex is measured in pSDX — a weighted representation of your staked SDX based on lock duration. Longer commitments earn greater influence.

Weight Multipliers

$1/1$

360 Days

Full 1.0x governance weight — maximum influence

$1/2$

180 Days

Half 0.5x governance weight — partial influence

Proposal & Voting

To submit a governance proposal, participants must meet strict qualification criteria ensuring that only serious, committed stakeholders can influence the ecosystem's direction.

1

Stake

Minimum 50,000 USDT equivalent stake required to qualify for proposal submission

2

Lock

Stake must be locked for a full 360 days to activate governance eligibility

3

Get pSDX

Receive your governance weight tokens based on staked amount and lock multiplier

4

Delegate

Optionally delegate your pSDX voting power to another trusted participant

5

Vote

Cast your vote on active proposals proportional to your pSDX weight

StakeFundex
ULTIMATE FUTURE

AI Emission Manager

The AI Emission Manager is an intelligent system that dynamically controls token supply based on real-time ecosystem activity. Instead of fixed minting, the system introduces a controlled and demand-based emission model.

Adjusts emission based on ecosystem activity

Maintains supply-demand balance

Prevents uncontrolled inflation

Supports long-term ecosystem stability

Fully Automated : The AI Emission Manager operates 24/7 without human intervention, ensuring consistent and unbiased ecosystem management.

StakeFundex
ULTIMATE FUTURE

Core Advantages

StakeFundex is engineered from the ground up with four foundational advantages that differentiate it from conventional staking platforms.

Controlled Emission

AI-managed token minting ensures supply never outpaces demand, protecting the value of every staked token in the ecosystem.

Sustainable Rewards

ROI is structured and compounding — designed to deliver consistent returns over the long term without compromising ecosystem health.

Strong Liquidity System

The Turbine mechanism and LP Bond system work together to maintain deep, stable liquidity across all market conditions.

Multi-Income Model

Participants earn through staking ROI, referral bonuses, team differential bonuses, and creator milestone rewards simultaneously.

Ecosystem Highlights

StakeFindex is built on a robust, scalable infrastructure designed to deliver speed, transparency, and multi-dimensional earning opportunities for every participant.

- 1 Polygon-based fast transactions
- 2 Real-Time Auto-Compounding ROI
- 3 Multiple income streams (Staking, Referral, Team, Creator)
- 4 Transparent smart contract architecture
- 5 Sustainable and scalable growth model
